

Trainor Modular Walls offers a variety of modern, eco-friendly partition and office space solutions and we will gladly assist you in finding the one that is right for you. These high-performance partition systems allow your office space to grow easily and affordably as your business grows.

We produce modular wall systems made up of "units" or "panels" that are:

- :: pre-engineered,
- :: pre-fabricated,
- :: pre-assembled, and
- :: pre-glazed.

In manufacturing facilities that are:

- :: organized,
- :: safe,
- :: clean, and
- :: climate controlled.

Our plants are state-of-the-art, providing:

- :: automated, precision cutting,
- :: custom tooling, and
- :: an organized plant flow.

TRAINOR MODULAR WALL SYSTEMS REVOLUTIONIZE INTERIOR WALL CONSTRUCTION

By completing the bulk of the detailed assembly work in our controlled manufacturing facilities, we:

- :: drastically reduce field labor tasks;
- :: drastically reduce field labor hours and, therefore, cost.

RESULT:

- Superior quality. Unitized panels are airtight and acoustically superior as soon as they are erected.
- Rapid wall install times. A skilled 2 man crew can install about 30 linear feet of modular wall per day.
- Less field labor hours, resulting in less cost.
- Overall time, money and worry savings. Our modular wall systems keep projects on budget and on time.

Why Choose Modular Walls?

- **Flexibility** | change the configuration of your workspace without the hassle or cost of new construction
- **Aesthetic** | clean, modern design that leaves your space feeling open
- **Environmental** | partitions are constructed out of 100% recyclable aluminum and glass
- **Sustainability** | durable design and ease of reconfiguration allows for many years of use
- **Economy** | less waste during installation and more allowance for natural light help reduce costs
- **Variety** | choose from a plethora of finishes, colors, panel materials and glazing options
- **Doors** | frameless, double-glazed frame or wood construction
- **Cost-effective** | over 5 times faster depreciation rate than permanent construction ¹

¹We recommend consulting your tax advisor to determine the proper depreciation life.
